Projects

AI Image Generator App (Text → Image) — MERN Stack

MongoDB, Express.js, React.js, Node.js, ClipDrop API

- Built a production-ready AI-powered SaaS platform that generates high-quality images from text prompts using the ClipDrop API.
- Implemented secure user authentication with JWT, bcrypt, and role-based access control.
- Developed a credit-based usage system with daily limits and scalable support for payment integration (Razorpay/Stripe).
- Designed a fully responsive frontend using React Hooks, Context API, and Tailwind CSS.
- Built optimized and scalable REST APIs in Node.js + Express.js for smooth client-server interaction.

Open Source Contributions

- **Hacktoberfest 2025 Achiever** — Completed 4+ quality pull requests under DigitalOcean's program; earned official rewards (T-shirt, Badge, Holopin Profile) and contributed to sustainability via tree plantation.
- Contributed to repositories such as *First Contributions*, *Awesome Portfolio Websites*, and *JavaScript Algorithms* — improving documentation, fixing bugs, and enhancing frontend features.
- Gained hands-on experience with **Git/GitHub workflow** (fork, clone, branch, commit, pull request, code review, merge) and collaborated with global developers.

Certifications

- **Introduction to Cloud** — Cognitive Class, Aug 2025, Credential ID: 1cd165923ee3416fafa639b4f3f8d62b
- **Angular** — Infosys Springboard, Jun 2025
- **Full Stack Programming Course** — Udemy, Feb 2025

Academic / Self-Learning Experience

- Built projects like Weather App, Todo App, and Simon Says Game using HTML, CSS, and JavaScript, and deployed them online.
- Explored modern tools like React.js, Tailwind CSS, Git/GitHub, and REST APIs.

Achievements

- Maintained active GitHub repositories showcasing deployed web projects and open-source contributions.
- **Competitive Coding:** Solved 70+ DSA problems on LeetCode and GFG.
